

In the Abstract

After the claims, kindly insert the Abstract of the Disclosure as provided on the following page.

PRESSURE LIMITING DEVICE FOR A HYDRAULIC BRAKING CIRCUIT OF VEHICLE
ABSTRACT OF THE DISCLOSURE

The device comprises a leaktight housing which is hydraulically connected between braking elements of the front and rear wheel(s). The housing comprises a body and fittings which enable the hydraulic fluid to flow into the braking elements of the rear wheels until an adjustable set pressure is obtained, after which the pressure is reduced in the braking elements of the rear wheel(s) in a manner which is proportional to the pressure increase in the braking elements of the front wheel(s).
